III. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW: Primary Route(s) of Entry: Eyes, Skin, Inhalation, Ingestion
POTENTIAL HEALTH EFFECTS: Danger! Harmful or fatal if swallowed. May cause respiratory tract irritation. Pulmonary aspiration hazard. While ingesting or vomiting, may enter lungs and produce damage.
EYE: Non-irritating
SKIN: Practically non-toxic if absorbed through the skin. Substance does not generally irritate and is only mildly irritating to the skin.
INHALATION: High vapor concentrations are irritating to the eyes, nose, throat, and lungs.
INGESTION: Practically non-toxic if ingested. Product may be harmful or fatal if swallowed. Pulmonary aspiration hazard. While ingesting or vomiting, may enter lungs and produce damage.
MEDICAL CONDITIONS AGGRAVATED: The following diseases or disorders may be aggravated by exposure to this product: skin, respiratory system, lung (asthma-like conditions).
POTENTIAL ENVIRONMENTAL HAZARDS: This product is toxic to fish and aquatic organisms. Do not apply directly to water, or to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on the label.

IV. FIRST AID MEASURES

EYES: Hold eye open and rinse slowly and gently with water for 15 – 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
SKIN: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 – 20 minutes. Call a poison control center or doctor for treatment advice.
INHALATION: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.
INGESTION: Call a poison control center or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give any liquid to a person. Do not give anything by mouth to an unconscious person.
NOTES TO MEDICAL DOCTOR: Treat symptomatically

V. FIRE FIGHTING MEASURES

Flash Point (Method Used): 385F TYPICAL (COC)

Auto Ignition Temperature: 650F estimated

Lower Explosion Limits: ND

Upper Explosion Limits: ND

NFPA/HMIS Rating: Health: 1

Fire: 1

Reactivity: 0

EXTINGUISHING MEDIA: Foam
 Dry Chemical

Alcohol Foam
 Water Spray

CO₂
 Other

UNUSUAL FIRE AND EXPLOSION HAZARDS: Combustible at high temperatures. Vapors may accumulate in confined areas.

FIRE FIGHTING PROCEDURES: Wear structural fire-fighting gear. Use a water spray to cool fire-exposed containers and structures, disperse vapors and protect personnel.

HAZARDOUS COMBUSTION PRODUCTS: Combustion may produce carbon monoxide, carbon dioxide and other asphyxiants

VI. ACCIDENTAL RELEASE MEASURES

RELEASE NOTES: If material is spilled, contain spilled liquid with sand or earth. DO NOT use combustible materials such as sawdust. Use appropriate personal protective equipment as stated in Section VIII. Advise the Environmental protection Agency (EPA) and appropriate state agencies, if required. Absorb spill with inert material (e.g. dry sand or earth), then place in a chemical waste container. Vacuum or sweep up material and place in a disposal container.

VII. HANDLING AND STORAGE

GENERAL PROCEDURES: Store in a cool, dry, locked area out of reach of children. Keep container tightly closed in storage to prevent entry of water. Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited. NFPA Class IIIB storage. Flash point is greater than 200F.

OTHER PRECAUTIONS: Avoid contact with eyes, skin or clothing. Avoid breathing spray mist or vapors. Wash thoroughly after handling.

VIII. EXPOSURE CONTROLS/PERSONAL PROTECTION

ENGINEERING CONTROLS: Use local exhaust ventilation or other engineering controls to control airborne levels below recommended exposure limits. Use with adequate ventilation.

PERSONAL PROTECTION EQUIPMENT:

EYES AND FACE: Splash proof chemical goggles

RESPIRATORY: Concentration in air determines the level of respiratory protection needed. Use only NIOSH certified respiratory equipment. Respiratory protection is not usually needed unless product is heated or misted. Half-mask air purifying respirator with dust/mist filters or HEPA filter cartridges is acceptable for exposures to ten (10) times the exposure limit. Full-face air purifying respirator with dust/mist filters or HEPA filter cartridges is acceptable for exposures to fifty (50) times the exposure limit.

GLOVES: Chemical resistant gloves such as Polyvinyl chloride (PVC), Neoprene, Nitrile, Polyvinyl alcohol, Viton. Gloves of other chemically resistant materials may not provide adequate protection.

PROTECTIVE CLOTHING: Where splashing is possible, full chemically resistant protective clothing (e.g. acid suit) and boots are required. The following materials are acceptable for use as protective clothing: Polyvinyl alcohol (PVA), Polyvinyl chloride (PVC), Neoprene, Nitrile, Viton, Polyurethane.

WORK HYGIENIC PRACTICES: Wash face and hands before eating, drinking, smoking or using the toilet. Remove contaminated clothing and wash before reuse. For non-fire emergencies, respiratory protection may be necessary and wear appropriate protective clothing to avoid contact with material.
